

Fresh Perspective of Solvency II

Conference 2011

Solvency II is a major and significant reform. It will indeed have a deep and long-lasting impact as it opens new questions, which will force many to revisit significant elements of their business models and reconsider the way they operate. Solvency II also plays a key role in how consumers increase their confidence in Insurance Companies through the new regime. Many details of Solvency II are yet to be finalised and uncertainty over its exact shape is acting as a bar to firms pressing the green button on the investment programmes needed to meet the Directive's requirements. The conference will provide solutions to the most pressing Solvency II and risk management challenges through case studies, presentations and panel discussions.

Thursday, 17th November 2011
